

# FRANKFORT WAGES WAR ON VICE

## Citizens Raid Disreputable House Early Sunday Morning And Arrest Four Inmates

Vice in Frankfort township got a jolt Sunday morning when the house of ill fame on the old Scheer farm north of Frankfort was raided for the second time within a few weeks.

Shortly after the first raid the disreputable house opened again and has been running wide open in open defiance of the law and decency. Men to whom the citizens ought to be able to look for protection against such conditions appeared to be condoning the existence of this place and pleaded ignorance of its existence when asked why no action was taken against the dump.

Married men and young boys both from Mokena and Frankfort have been liberal patrons of this joint. The fees charged at this joint for the service they were rendering was said to have been \$6. People who patronized them thought nothing of blowing \$6 but if asked to give the same amount for a good cause would have pleaded poverty.

Things got to such a stage that a group of citizens of both Frankfort and Mokena who believed in riding the community of this sink hole of iniquity got busy Saturday night and planned a raid under the direction of the office of the state's attorney of Will County.

Three warrants were prepared calling for the arrest of the keeper of the house, of the inmates and patrons of the place. A number of men were sworn in as deputy sheriffs and swooped down on the joint at 3:30 o'clock Sunday morning just as the place had ended business for the night. The house was surrounded and some of the deputies entered the house and placed 3 women and 2 men under arrest, one of these men being George Boetcher of Green Garden who was in the kitchen when caught. The other youth was an Italian known as Tony who has been staying at this place since it opened a few weeks ago. Gilbert Knater, ex-deputy sheriff Frankfort was found seated in a car near the place and was also arrested.

The prisoners were taken to Frankfort before Justice Frank J. Kohlhaugen who assessed the women fines of \$200 and costs each, also the same amount to Tony the Italian lad. Boetcher and Knater asked for a jury trial and were released on bonds of \$200 each. Their cases will come up before Justice Kohlhaugen August 25th at 2 P.M. at Frankfort.

The inmates of the disorderly house did not have enough money to pay their fines. One woman giving her name as Mary Allen and said to have been the keeper of the place called a man by the name of Irving Brown from the Road House east of Frankfort and asked him to do something for them. He refused to do so and told her that he had advised her to get out of the community after the first raid. Finally he offered to pay the costs if the judge would remit the fines and would give his word of "honor" that the place would cease operations, but the judge would not listen to such a compromise and the three women and Italian youth were taken to the county jail at Joliet the same morning.

The quartet gave their names as Tony Longue, Edith Halterman, Marie Snyder and Mary Allen. On Tuesday they filed a petition for a writ of habeas corpus thru their attorney Frank Jones to effect their release from jail, but shortly afterward were re-arrested on information filed in the county court.

When arraigned in the county court the quartet pleaded not guilty and were taken back to jail. The Allen woman is charged in the information as keeper of the house and the others as inmates.

Judge Arthur W. De Selm fixed August 26th as the date for hearing on the petition and fixed the

bonds of the quartet at \$250 each. Now that information has been filed in the county court the hearing on the petition will have no effect on the case as it now stands.

The decent citizens of both Frankfort and Mokena are determined that this house of ill fame must be driven from the community and if this place opens up again it will be repeatedly raided and the keepers and inmates brought into court. The road house will also be watched closely as it would appear that both places are connected in some way otherwise the keeper of the disreputable house would not have had to call on "Mr. Irving Brown" for advice.

Had the raiders arrived a few minutes sooner it is said they would have caught ten men patrons from Mokena and Frankfort. When men heads of families and fathers of children throw away their respect and honor to patronize such a hell hole, it is time the decent element wages war to a finish on such conditions. The News-Bulletin is in possession of the names of some of the supposed patrons and if this information is proven true there would be a mighty upheaval if the names were made public.

It is hoped that with the co-operation of the parties who rented the Scheer premises to the keepers of the house of ill fame, the citizens committee will succeed this time in driving the rotten outfit from the community.

It is understood that some of the persons of the community have been preaching sermons on law enforcement and advising their congregations to clean up this spot of vice and iniquity.

It is surprising how many people in both Frankfort and Mokena look upon the house of ill fame as a much needed necessity for the community and defend its existence with all kinds of flimsy excuses.

This shows that the moral of the people have taken a decided drop downward and that it would be advisable for the churches to send missionaries here to convert the so-called "Christian people" instead of sending them to foreign lands to convert the heathen.

Remember the Scripture says: "Now the works of the flesh are\*\*\* Adultery etc. etc. \*\*\*They which do these things shall not inherit the Kingdom of God."

## Oak Lawn Nurse Explains Object of Welfare Station

There are a great many people who do not seem to understand just what a Welfare Station is for. The one at Oak Lawn is for all children up to six years of age. They are weighed and measured by the nurses and given a complete examination by a competent physician who suggests the proper feedings, calls the mothers attention to any defect he may find and advises her to go to her family physician. He does not prescribe any treatment or medicine.

Sometimes the defect is very minor and if taken in time does not amount to anything.

The object of the clinic is to teach the mothers how to keep their children well.

Do not bring a sick child to the Welfare Station but take it to your own doctor.

It is hard to understand why any doctor should refuse to take care of a child whose mother has taken it to a Welfare Station.

Irene O'Connor, Registered Nurse

## To hold bakery sale

The Ladies Aid Society of the St. John Evangelical church of Mokena will hold a bakery sale at the church parlors Saturday afternoon of this week.

## DEWEY'S "OLYMPIA" AT THE SESQUI

The famous old flag ship is shown at her berth in Philadelphia Navy Yard, the background for the Sesqui-Centennial International Exposition which celebrates 150 years of American Independence. Docked just in front of the Olympia is the U. S. S. Constellation, oldest fighting ship in commission. They daily attract thousands of visitors to the Exposition which continues until December 1.

## Paving Walloped

The concrete paving proposition which has been agitated for several months in Mokena, met a with a severe jolt last Friday evening when a citizens gathering was held at the village hall with the village board.

Alderman Ona E. McGovney outlined the object of the newly created Local Board of Improvements and showed why the Board considered concrete paving the most economical way, saying that it would be cheaper to build permanent streets instead of patching all the time.

The citizens could not see the matter in the same way and put up a strenuous protest on the ground that the cost would be too great. Arguments got hotter as the meeting progressed and many views were expressed. After a very hot debate, the meeting broke up in a near row.

## More Boquets

The News-Bulletin continues to receive messages of commendation on its attitude in cleaning up vice in Frankfort township. The Publishers Auxillary, a trade paper going into virtually every newspaper and printing office in the U. S., had a writeup on the News-Bulletin's crusade last week. The article quoted our head line, "We stand four square for Law Enforcement, Truth, Justice and Right." The article highly commended this paper for its stand.

We are also in receipt of the following letter from Rev. Irving E. Putnam, pastor of the Richard St. M. E. Church, Joliet:

"Dear Editor-Brother: "I am writing to thank you for the paper which you sent recently, giving your splendid editorial upon Law Enforcement. More strength to your arm and pen! You were hitting the bull's eye. Somebody needs to speak out. I have been doing some of it myself and expect to continue it.

"I am enclosing the front page of your paper with some underscoring of certain paragraphs to the Sheriff with a note which I think he will not forget.

"Again thanking you for the paper and your effort to make Will County a clean place in which to live, I am,

"Most cordially,  
"(Rev.) Irving E. Putnam."

We are pleased to note that the people still favor righteousness and these expressions of appreciation make the editor feel that the fight for the right is bound to have its rewards. The public can count on the

## Three Youths Hurt In Auto Accident

A serious auto accident occurred near the Cappel crossing east of Mokena last Saturday night about 10:45 o'clock when a Ford coupe driven by Walter Yunker ran into a Hupmobile driven by Henry Rolfe of Frankfort. With Mr. Yunker were Robert Geuther and Robert Maue. The impact of the collision was so great that the coupe was smashed to a pile of junk. All of the occupants were hurt. Robert Geuther was the most seriously injured suffering injuries to his nose and cuts about his face and head. He was taken to Silver Cross hospital Joliet after his wounds were dressed by a physician.

Mr. Rolfe was also injured when the steering wheel of the Ford broke off and crashed thru the windshield of the Hupmobile, striking Mr. Rolfe on the head. Another man with Mr. Rolfe was also injured by broken glass. At first it was said the collision was caused by Mr. Rolfe not having the lights on his car lit, but it was later shown that he did have lights on the car. Some passengers on the 10:45 R. I. train from Chicago saw the accident and stated that the Ford was racing the train and if it had not hit the Hupmobile it would have ran into the train in which event some of the youths would have been fatally injured.

## Mystery Pitcher Plays at Mokena

By popular demand the Mokena Baseball Club will play New Lenox Sunday Aug. 22nd at the Schiek diamond Mokena, game called at 2:30 p. m. A big surprise is in store. Mokena will have a mysterious masked pitcher whose identity will not be known until after the game. All fans are urged to come and see who the mystery pitcher is. Remember the place and the date. A red hot game is assured. As this will be a real game all fans are urged to come and bring their friends.

## Worth Fire Chief Resigns

After long and faithful service, our very capable chief of the fire department has sent in his resignation. He feels that his business interests require all of his attention. Much as he would like to serve the people it is absolutely necessary for him to get out of public life. His resignation will be a severe blow to the department and to the community.

(continued on back page)

## Zion Lutheran Church to Picnic

The annual picnic of the Zion Lutheran church of Tinley Park will be held at Vogt's woods east of Tinley on Sunday August 29th. There will be games and sports of all kinds, plenty of eats and refreshments and a jolly good time is assured for all who attend.

## Build Dam at New Lenox

A dam is being built across the Hickory creek in Brookwood Park in the north side of New Lenox. The dam is being built so as to provide boating and bathing for the residents of Brookwood.

## Old Landmark Sold

The old blacksmith and wagon shop of Mr. Osterman, located on 11th and Depot streets, Worth, which is one of the land marks of the town, is soon to give way to a modern brick building.

Mr. Young of Chicago has purchased the place from Mr. Osterman. It is reported that he plans to erect a modern building to house a bank and a drug store with apartments above.

To show his good faith, Mr. Young donated \$500 to the village to improve Depot street. Such public spirited men are the type we need in our community.

## Tinley Park Lays Mile of Mains

Tinley Park is making a big stride in the improvement line by extending the water mains to all parts of the village. The contractor who was awarded the job of laying one mile of water mains started work last Friday. He has a wonderful machine which digs the trenches and lays the pipe. The work will probably be finished in a week. The improvement costs \$8,000 for which bonds have been issued.

## Get Your Premium

For a limited time only the News Bulletin is offering free a very useful premium with every new or renewal subscription an aluminum covered kettle. Some years ago we offered rubber aprons as premiums and they went like hot cakes and we feel this premium will take as well. Read the adv., elsewhere in this paper describing the premium more fully. The News-Bulletin has earned the reputation of giving premiums that can be relied upon. Read the adv. and act quick.

News-Bulletin to champion the big cause of Right at all times, no matter what the cost. This paper never backs down on the right.

## "By Their Schools Ye Shall Know Them"

by Edith Bradley Wells

The death of Robert Todd Lincoln, last of the male descendants of the great Civil War President, brings back to us again the character and ideas of Abraham Lincoln. The Literary Digest says, "Lincoln's regard for his son Robert was deep-seated. Himself deprived of high educational advantages, he early determined that his oldest son should have the best. He sent him to Exeter, N. H. and later to Harvard, and to show his interest in the boy, he went to Exeter on Saturday, March 3, 1860, and there made an address...."

Lincoln, then, sufficiently valued education to work night and day to get it for himself, and realizing the importance of education sent his son to the "best schools." And Abraham Lincoln was a wise man. But, you may protest, Robert Lincoln with all his education was not as great a man as his father. That is true. But men of the stamp of Washington and Lincoln are not born oftener than once in a generation. Abraham Lincoln would have been a great man, even if he had had a University training. The marvel of Lincoln is that he succeeded despite his lack of regular schooling. No one less than a genius could have gone as far as Lincoln did without more training. And GENIUSES are scarce. The work of the world is done by the average man. And well it is so. If we sat back and waited for geniuses to appear among our children, and waited for these very few geniuses by sheer force of their own ambition and hard work to acquire an education and then run the world, the old world would soon be in a pretty sad state. We must train our average children to do the work of the world. And our average child usually needs considerable incentive to make him swallow the training which we know he will need in this world of keen competition.

And herein lies the value of good schools. Let's forget Abraham Lincoln, the genius, for a minute, and see what sort of a man Robert Todd Lincoln turned out to be. Robert who was an AVERAGE boy, but whose father was wise enough to educate in the best schools. Robert Lincoln was a member of President Garfield's Cabinet, filling the post of Secretary of War; he was Ambassador of the United States to Great Britain; he was for years president of the Pullman Car Corporation.

## DEBONAIR VAGABOND FELTS; BEACH WEAR IS PRACTICAL

THAT something new in millinery, always due to appear for late summer, has arrived this year in force. Shop windows and promenades are full of gay emigrants from Paris—newly arrived and very captivating. Light felt hats, to be worn with the airiest day dresses and sports clothes and probably destined to reappear in darker colors, or brighter ones, for fall. These are the "vagabond" hats with which summer is ringing down the curtain on the best performance in millinery for several years. They are only successful in fine qualities and are made with narrow or medium-wide, floppy brims in light tans, gray, pale rose, pinkish tan, ivory, putty color, and other delicate shades. Usually they are trimmed with rib-

bon but they cannot be described as simple, for the trims are intricate and the ribbon sometimes a bit gorgeous, when gold or silver metallic patterns are used.

The group of late summer hats shown here includes four felts of the vagabond type and one French sailor in straw. Both the smooth, creamy felts and the rougher "scratch" varieties are shown in the new shapes. The group leads off with a narrow-brimmed model that flares upward across the front and left side. The crown is draped with ribbon collar and ornament which is placed at the right side. The French sailor, in natural straw color, has its brim edge bound with narrow gilt braid, and this binding is repeated on the ribbon collar and buckle made of ribbon. A

Some Emigrants From Paris.

berized silk (including rubberized moire) or those of cretonne or terry cloth. The silks are shown in gay colors or quiet ones, and in many novel, futuristic designs. Gray is the favored solid color but there is far more demand for bright-colored patterns. Whatever the cape or robe may be made of, fashion approves a choice of colors that will harmonize with the bathing suit and show some relation to it. A new idea is a beach blanket of terry cloth that does

Practical Wear for the Beach.

small shape that hints of the vagabond type has a handsome collar about the crown, made of overlapping lengths of velvet ribbon and is finished with a small ornament at the front, but very vagabondish is its neighbor with dented crown, brim widened and turned up at the back. A ribbon collar and a rosette, made with irregular plaits, trim it.

A similar shape with two ridges in the crown is content with a flat ribbon collar finished with groups of plaits at the side where two small cabochons made of strips of felt are placed.

It does not take long to tell the story of that most essential article of beach wear—the bathing suit. It is brief in every particular. Apparently all the world that goes to the beaches

double duty, serving as a wrap as well as a blanket. Capes are the most popular wraps for beach wear and all of them may be passed up for the "slicker." Even the cap must follow the lead of the suit and wrap in color, if it is to register smartness. There is considerable variety in this water millinery, with the helmet-shaped affair a great favorite. Rubber slippers or satin shoes dispose of the footwear question.

Boxes that look like undersized hat boxes, with rubberized lining, serve to carry beachward all bathing needs, but amusing bags of rubberized silk that simulate queer dolls and conventional bags of cretonne outnumber them. Very pretty beach pillows are made of colored oilcloth.

## BEFORE HER BABY CAME

Used Lydia E. Pinkham's Vegetable Compound

Adkins, Texas.—"Before my baby came I was so weak I had to stay in bed most of the time until I began taking Lydia E. Pinkham's Vegetable Compound. My mother-in-law, who is a midwife, told me it was all foolishness for me to stay in bed. She told me to take Lydia E. Pinkham's Vegetable Compound and it would help me. She handed me one of your little books and I read it and was interested in it. I went to a drug-store that night and got a bottle of your wonderful medicine. I took it until the baby was born and was able to be up and do my work. Baby is 4½ months old now and weighs 14 pounds. I have plenty of milk for her and she gains steadily. I recommend it. I am willing to answer letters and will do anything I can for any woman, for I know how I suffered."—Mrs. A. H. TSCHIRHAET, R. No. 2, Box 39, Adkins, Texas.

Lydia E. Pinkham's Vegetable Compound has been in use by women for over fifty years. It is a vegetable tonic made from roots and herbs and is sold by all druggists.

Recommended by women everywhere.

### SUMMER PRUNING OF DWARF TREES

Summer pruning, done properly, has the most beneficial effect, especially as regards cordons and espaliers, or other trained trees. The branches should be kept at 12 inches distance apart, and the leading growths shortened to insure a proper breaking of the buds throughout the whole length of the branches, which, of course, results in side shoots, says the Gardeners' Chronicle.

The side shoots should be gone over during the season of early growth, when they have made six to eight leaves, and pinched back with the finger and thumb to five leaves. The shoots will push growth from one or two of the upper buds, and these laterals should be pinched back to two leaves. If the trees are very vigorous, or the autumn wet, a third pinching may be needed. The immediate result is to keep the side shoots within bounds. The leading, or extension, shoot will be clean and vigorous, and the growths from the buds lower down will be well nourished. At the autumn or winter pruning of these side shoots, four buds are left on each, if the tree be young and vigorous, or three will suffice on old trees or those of modern vigor. The reason for leaving four buds is that two must make some growth, while the two lower ones make only a little wood and a few leaves, practically spurs, to develop into fruit-buds the following year.

The reason for pinching side shoots is to transform them into spurs. Instead of allowing them to grow freely and then cut them hard back to two buds, causing them to push fresh growth from one or both, while giving a check to the tree by removing so much foliage at one time. The result is a thicket of shoots, for the close pruning in winter to a couple of buds means two strong shoots from each one then shortened, and the object of having bearing spurs near to the branch is frustrated. The thing is to get the spur and bloom-buds formed on them, for as soon as a blossom-bud has developed on a spur the growth extending beyond it may be removed, so as to make the tree neat and prevent over-crowding of the foliage. No buds beyond the bloom-bud are necessary to draw the sap into it, the spur being provided with its own foliage and also the truss of fruit that follows, while a blossom-bud cannot be forced into wood growth by close pruning. The foregoing remarks apply to such fruits as are grown upon the spur-system—apples, pears, and plums.

### Spray Cherry Trees for Control of Leaf Spot

The fight against cherry leaf spot has only begun when the growers finish the application of summer strength concentrated lime-sulphur immediately after harvest, states A. Freeman Mason, extension specialist in fruit growing at the New Jersey College of Agriculture, New Brunswick. At least two additional sprays must be applied, at intervals of two weeks, if the disease is to be kept in check.

Cherry leaf spot is one of the most serious diseases attacking the sour cherry. Small brown spots appear on the leaves in midsummer. These leaves soon turn yellow and fall off, occasionally resulting in practically complete defoliation by the middle of August.

The presence of large, healthy green leaves is essential to the production of fruit buds for successive crops. The defoliation of the cherry tree weakens the tree and makes it less able and less likely to set fruit on succeeding years. The application of three successive sprays of concentrated lime-sulphur diluted one part to fifty parts of water, at intervals of two weeks, starting immediately after harvest, will control leaf spot and will enable the tree to retain its foliage until October.

### Horticulture Hints

Raspberries should be set in rows 6 to 8 feet apart.

Many orchard trees would set no fruit were it not for the bees which pollinize the blossoms.

Apple growing requires more thinking and planning perhaps than any other line of agricultural work. The grower must think accurately, on time, and ahead if he would succeed.

Judicious fertilization may be needed because the grower cannot expect apple trees to grow well or to bear regular and profitable crops unless plenty of plant food is supplied.

Apple trees require pruning and training. This is necessary to develop trees which will bear a heavy load of fruit without their limbs breaking.

It is necessary to prune and train the trees properly in order to facilitate such orchard operations as spraying and harvesting.

Take the mystery out of fruit growing. There is no hocus-pocus or black magic in fruit growing. Neither can the grower depend upon "cure-alls."

## Skim Milk Made Use of as Feed

### Large Quantities Formerly Wasted Now Converted Into Nutriment.

(Prepared by the United States Department of Agriculture.)

Large quantities of skim milk formerly wasted or inefficiently used are being converted into a marketable product by a number of companies utilizing a process recently perfected by the bureau of dairying, United States Department of Agriculture. One company has sold more than a million pounds during the last year for poultry and hog feed. At Grove City, Pa., this manufactured product—concentrated sour skim milk—is made under the direction of department dairymen and sells at 4 cents a pound, netting 62 cents a hundred pounds of skim milk.

#### How Process Works.

Briefly, the process consists of the use of a culture containing a mycoderma, which is a yeastlike organism, and an active culture of the bacterium type. When used in combination they are able to develop more than double the amount of acidity in the skim milk produced by ordinary lactic cultures alone. The use of this mixed culture has made it possible to create an acidity of 2 per cent in skim milk which when concentrated at the rate of 3 to 1 gives the finished product an acidity of 6 per cent. An acidity of 2 per cent removes the difficulties formerly experienced in concentrating skim milk in the vacuum pan, and 6 per cent acidity in the finished product prevents spoiling. The product has been kept in good condition for more than a year.

#### Useful Poultry Feed.

Concentrated sour milk is a pasty, semifluid product. As poultry feed it is mixed with water or dry mash. Good results are obtained with the product when fed to baby chicks in a dilution of 1 to 8; when fed to laying hens either in paste form or in a mixture of 1 pound of paste to 1 pound of dry mash; and when fed for crate fattening at the rate of 40 pounds of the paste to 100 pounds of mash.

The utilization of surplus skim milk in manufacturing this concentrated product promises a greater outlet to the dairymen for his products and assures the poultryman of a uniform supply of a good feed that has excellent keeping qualities.

### Sparrows and Pigeons

#### Disease Germ Carriers

Recent investigations have determined that sparrows and pigeons may carry the avian or chicken type of tuberculosis from chickens to pigs or hogs and from an infected flock of chickens to a noninfected flock. The sparrow or pigeon flies from infected pens or flocks to a healthy flock and contaminates the feed. There is also strong circumstantial evidence that sparrows and pigeons can transmit fowl cholera from infected to healthy flocks of chickens. It is also possible that they may transmit roup, sorehead and the larvae of different kinds of worm parasites. It is also said that sparrows and pigeons carry or transmit the virus on their feet.

No doubt chicken lice and mites are transmitted from farm to farm by pigeons and sparrows.

Possibly pigeons cover greater areas than sparrows, hence are more dangerous.

When possible prevent sparrows and pigeons from feeding with farm animals. Some one must discover a method of eradicating sparrows; and when pigeons are raised, bred and fed on farms they should be kept to themselves.

### Reduce Stem Rust Harm by Eradicating Barberry

Thirteen states are now co-operating with the federal bureau of plant industry in the eradication of the barberry as a means of controlling the stem rust on grain. Dr. C. R. Ball, in charge of cereal crops and diseases, and Lind D. Hutton, associate pathologist, are now inspecting the barberry eradication work in Michigan, Ohio, Wisconsin, and several other states.

More than 12,000,000 barberry bushes have been destroyed in the thirteen states affected since 1918, and it is claimed by bureau specialists that there has been a reduction in stem rust damage over the entire area. The largest number of bushes have been found in the Great lakes states. It is said that they have caused a loss on an average of 50,000,000 bushels of small grain because of rust damage. The federal government and states have spent during the last eight years \$2,500,000 in barberry eradication work.

### Contact Sprays Destroy

#### Lice on Cucumber Plant

It is not usually very satisfactory to do anything to combat the lice which work on cucumbers and many other plants, when they became very numerous. About all that can be done is to spray with some of the contact poisons, such as insect powder, nicotine sulphate, Good Leaf 40, etc., which can be obtained at a drug store.

As a general thing the insects called lady bugs, of which there are several kinds, keep the lice down to small numbers, but once in a while the lice become very abundant. If you use a spray it must be done very thoroughly and probably quite often, and even then you may not save the plants before they are so much injured as to be unable to produce a crop.

# 1 in every 4

DURING the first six months of 1926 one in every four buyers of new automobiles bought a General Motors car. During 1925 the proportion was about one in five. During 1924 it was one in six. This steady addition of new friends for the products of General Motors has a double significance.

1. It is proof that the grouping of strong companies in one big family is economically sound. Large scale operations do make possible important economies; and these economies do benefit the buyer, in greater value. The public has recognized this principle and profited by it.

2. Increased public patronage involves increased obligation. General Motors is directly responsible for the welfare of its 152,000 employees and their families, its 20,000 dealers, and indirectly for the six thousand companies which furnish it with supplies and materials — at least a million men,

women and children to whom its public good is a very personal concern.

As the volume of production increases there must be a corresponding increase in the values offered. The new series of cars just presented does embody larger values; it is a direct reflection of the fact that more than 1,075,000 General Motors cars were sold at retail during the year just closed. The added quality has been built in where its presence counts most in comfort and safety and long life.

With great pride we invite you to inspect these new General Motors cars.

### His Identity

"You're a motor tourist, eh?" began Squire Ramsbottom of Pefunty, addressing an offender, who had been brought up before the bar of justice by Constable Slackputter.

"Not exactly," replied the stranger. "When I think of the times I have turned out and gone around to avoid mud holes, broken bridges, and so on, I am inclined to think that I am a motor detourist."—Kansas City Star.

Even being dignified has to be done with grace—which is not pomposity.

### More Rough Diamonds

In the past the United States imported largely polished diamonds, but in the last few years the number of rough diamonds brought in has been considerably increased, the 1925 imports being more than double those in 1924. This indicates an expanding industry in the United States among the diamond polishers.

According to a New York city fire chief, the fate of a fire depends upon the work done in the first three minutes of the blaze.

### Boy Scouts

"Accidents reveal the resources of a host, and of a leader." The Boy Scout, whose training includes first aid and a knowledge of Monarch Cocoa is on the way to success both as host and leader.

## FRANKFORT

Mrs. Minnie Dammann who has been very ill for sometime at the home of her son in Joliet remains about the same.

Mrs. Peter Pfeifer is very ill since last Friday at the home of her daughter Mrs. John Stauffenberg in Green Garden. Chas. Pfeifer, her son, who is foreman of the extra gang of the E. J. & E. at Ivanhoe, Indiana, was called home Saturday on account of his mother's condition.

Levi Doty attended the Kankakee Fair last Monday.

The Frankfort 4 H Sewing Club had their "Achievement Day" last Friday at the Frankfort Public school. A fine program was rendered and the display of dresses and other garments which had been made by the girls showed much skill on the girls part and also on the instructor's. Besides these garments there was a display of seams, darning and patching. The girls and teachers received many fine compliments on their excellent work. Friday the Club had their picnic on the lawn of Mrs. George Andrews.

Miss Sara Balchowsky had her tonsils removed last Monday at Silver Cross hospital. On Friday Miss Laura Dittrich had her tonsils out at the same hospital, Dr. Hedges being the surgeon for both cases.

Mr. Frank Kohlhaas left Monday morning for Iowa where he will take

treatments.

Mr. and Mrs. Manson La Hue had as dinner guests last Sunday, Mr. and Mrs. Rolland Meeks and daughter and Mr. Henry Mull and daughter of Joliet.

Wm. Peters is ill at the home of his daughter, Mrs. Max Haass.

Mrs. George Pfeiffer of Chicago Heights, was taken to Silver Cross hospital last Monday afternoon from the home of her sister-in-law, Mrs. John Stauffenberg.

Roy Stellwagon returned home Sunday from a week's visit with relatives in Chicago.

Mrs. Geo. Schroeder, Jr., will entertain the Pinochle club at her home, Sept., 2nd, at 1:45.

Mr. and Mrs. Wm. Kampe and family and Mrs. John Kampe spent last Friday at Lincoln Park.

Miss Lillian Parker who has been working for Henry Elsner, was recently married in Chicago.

Miss Eva Fralich is working at the home of Fred Marti.

The Heisner family held their reunion last Sunday at the home of Chas. Heisner in Green Garden. A very pleasant time was had.

Vera Haake returned home from Crown Point, Indiana, after spending two weeks with relatives.

Mrs. George Pfeiffer underwent an operation at Silver Cross hospital Wednesday morning.

Chas. Pfaff, Jr., expects to leave soon for Kansas City, Mo., to visit with relatives. His wife and daughter have been there for the past few weeks.

Mrs. Brinkeman who has been ill was removed to the home of her daughter, Mrs. Fred Heft.

The Pfaff flat has been rented to a Blacksmith from Chicago Heights.

Miss Margaret Stephens, daughter of Mr. and Mrs. Robert Stephens was injured in an automobile accident last Wednesday night in Joliet. Her ankle was sprained and suffered cuts on her face and other bruises.

Where premium is mailed 25c extra is repuired to cover packing charges and postage.

## ORLAND

There are mysterious meetings being held at Orland, at St. Michael hall. The men of the church who promised to serve the dinner at the first night of the Bazaar Oct., 6th, are making preparations. There are so many responsible positions to be filled for that evening, cooks, waiters, dishwashers, and then it seems as tho every man has a different opinion on the menu. One member says, "Just have plenty of gravy," another says, "Have plenty of sweet potatoes", and another says, "Have big baked potatoes, then we wont have to peel them", "just get some weenies, and buns," etc., until the chairman, Andrew Ludwig, is distracted and threatens to hire a chef and then the argument begins all over again. If Andrew survives this affair, he will be capable of managing the Blackstone.

The Ladies of the Palos Oak Hills cemetery wish to thank all who extended their help to make their dinner at Miss Helen Campbell's home on Saturday August 14, the success that it was.

ORLAND M. E. CHURCH  
Elmer L. Setterlund, Pastor.  
Moving picture on Friday Aug. 20th is "Light of the Western Stars," a Zane Grey romance of the Arizona border cowboys. Also 8:30 Fable comedy.

Sunday Aug. 22nd.—Bible school at 9:30 A.M. Our Bible school attendance seems to be increasing even during the hot weather of August. We noticed several new faces last Sunday—but there is room for more.

Morning Worship at 10:30 .  
The sermon is the next in the series on "The World's Greatest Short Stories."

The evening service will be a union one with both Palos Park and Worth churches at the Worth Community church. The speaker of the evening and the singer are from Chicago. Everyone cordially invited.

Next Sunday morning there will be a unique service at Palos Park at 6 A.M. Standard time. An out door prayer meeting will be held on the hill in Palos Park, just back of Dunlap's Stand. Everyone welcome, but bring sweet rolls and fruit with you for breakfast—served after the service. Coffee will be furnished. This will be called an "Inspiration Hill" service.

Last Sunday evening the pastor of the Orland M. E. Church preached at the Worth Community church to a most appreciative audience. The pulpit of the Orland M. E. Church was occupied by the former pastor of the Palos Park Church.

At the Sunday morning service on August 15th Mrs. Emma DeWeese and daughter, Verla were received into the fellowship and membership of the Orland M. E. Church.

A Cooper family reunion was held recently at the former home of the parents and grandparents, Thomas and Ellenor Cooper. The family was invited to assemble at the Orland M. E. Church for Sunday morning worship but as the weather was unfavorable and the clouds even shed a few tears of joy for the pleasure of joining in such an occasion not all were able to attend the church service but with a slight delay gathered at the old home which was beautifully decorated in national colors by the Twins.

A sumptuous chicken dinner was served to over 100 Coopers under the weeping clouds which dampened the ground and sharpened up the appetites of the family for they ate and ate until someone suggested that they had better have their picture taken as they didn't know as they would ever look any better than they did after such a dinner. A photographer from Chicago was told to try his luck which he did with remarkable success.

The Mokena band under the direction of Mr. Tonn entertained the remainder of the afternoon and was very much appreciated by the cheerful crowd who was sure Mokena ought to be congratulated to have such a band in their community. Refreshments were then served in form of tubs of ice cream and a load of pop which was soaked up by the boys either on the inside or the outside, it appeared to make no difference, ask the boys about it who performed a good many stunts on the ponies which they were riding.

The event likely would have not come to pass had it not been for the coming from Wisbech, England of Thomas and Ellenor Cooper in 1850 to Orland township. While residing here twelve children were born, and 1 son John was born in England and was 4 years old when he discovered America. Seven of the children are still living and enjoyed being together again at the old home which has been owned

HOME WANTED FOR A BABY

# BARÉE, Son of Kazan

By JAMES OLIVER CURWOOD

(©, Doubleday, Page & Co.)

## Chapter VI—Continued

It was a splendid night that followed. Perhaps Barée would have slept through it in his nest on the top of the dam if the bacon smell had not stirred the new hunger in him. Since his adventure in the canyon, the deeper forest had held a dread for him, especially at night. But this night was like a pale, golden day: it was moonless; but the stars shone like a billion distant lamps, flooding the world in a soft and billowy sea of light. A gentle whisper of wind made pleasant sounds in the treetops. Beyond that it was very quiet, for it was Puskowepesim—the Moulting Moon—and the wolves were not hunting, the owls had lost their voice, the foxes slunk with the silence of shadows, and even the beavers had begun to cease their labors. The horns of the moose, the deer and the caribou were in tender velvet, and they moved but little and fought not at all. It was late July, Moulting Moon of the Cree, Moon of Silence for the Chippewyan.

In this silence Barée began to hunt. He stirred up a family of half-grown partridges, but they escaped him. He pursued a rabbit that was swifter than he. For an hour he had no luck. Then he heard a sound that made every drop of blood in him thrill. He was close to McTaggart's camp, and what he had heard was a rabbit in one of McTaggart's snares. He came out into a little starlit open and there he saw the rabbit going through a most marvelous pantomime. It amazed him for a moment, and he stopped in his tracks.

Wapooos, the rabbit, had run his furry head into the snare, and his first frightened jump had "shot" the sapling to which the copper wire was attached so that he was now hung half in midair, with only his hind feet touching the ground. And there he was dancing madly while the noose about his neck slowly choked him to death.

Barée gave a sort of gasp. He could understand nothing of the part that the wire and the sapling were playing in this curious game. All he could see was that Wapooos was hopping and dancing about on his hind legs in a most puzzling and ungainly fashion. It may be that he thought it some sort of play. In this instance, however, he did not regard Wapooos as he had looked on Umisk the beaver. He knew that Wapooos made mighty fine eating, and after another moment or two of hesitation he darted upon his prey.

Wapooos, half gone already, made almost no struggle, and in the glow of the stars Barée finished him, and for half an hour afterward he feasted.

McTaggart had heard no sound, for the snare into which Wapooos had run his head was the one set farthest from his camp. Beside the smoldering coals of his fire he sat with his back to a tree, smoking his black pipe and dreaming covetously of Nepeese, when Barée continued his night-wandering. Barée no longer had the desire to hunt. He was too full. But he nosed in and out of the starlit spaces, enjoying immensely the stillness and the golden glow of the night. He was following a rabbit-run when he came to a place where two fallen logs left a trail no wider than his body. He squeezed through; something tightened about his neck; there was a sudden snap—a swish as the sapling was released from its "trigger"—and Barée was jerked off his feet so suddenly that he had no time to conjecture as to what was happening.

The yelp in his throat died in a gurgle, and the next moment he was going through the pantomimic actions of Wapooos, who was having his vengeance inside him. For the life of him Barée could not keep from dancing about, while the wire grew tighter and tighter about his neck. Furiously he struggled. It was a miracle that the fine wire held him. In a few moments more it must have broken—but McTaggart had heard him! The Factor caught up his blanket and a heavy stick, as he hurried toward the snare. It was not a rabbit making those sounds—he knew that. Perhaps a fisher-cat—a lynx, a fox, a young wolf—

It was the wolf he thought of first when he saw Barée at the end of the wire. He dropped the blanket and raised the club. If there had been clouds overhead, or the stars had been less brilliant, Barée would have died as surely as Wapooos had died. With the club raised over his head McTaggart saw in time the white star, the white-tipped ear and the jet black of Barée's coat.

With a swift movement he exchanged the club for the blanket. In that hour, could McTaggart have looked ahead to the days that were to come, he would have used the club. Could he have foreseen the great tragedy in which Barée was to play a vital part, wrecking his hopes and destroying his world, he would have beaten him to a pulp there under the light of the stars. And Barée, could he have foreseen what was to happen between this brute with a white skin and the most beautiful thing in the forests, would have fought even more

bitterly before he surrendered himself to the smothering embrace of the Factor's blanket. On this night Fate had played a strange hand for them both, and only that Fate, and perhaps the stars above, held knowledge of what its outcome was to be.

Half an hour later Bush McTaggart's fire was burning brightly again. In the glow of it Barée lay trussed up like an Indian papoose, tied into a balloon-shaped ball with babiche thong, his head alone showing where his captor had cut a hole for it in the blanket. He was hopelessly caught—so closely imprisoned in the blanket that he could scarcely move a muscle of his body. A few feet away from him McTaggart was bathing a bleeding hand in a basin of water. There was also a red streak down the side of McTaggart's bullish neck.

"You little devil!" he snarled at Barée. "You little devil!"

He reached over suddenly and gave Barée's head a vicious blow with his heavy hand.

"I ought to beat your brains out, and—I believe I will!"

Barée watched him as he picked up a stick close at his side—a bit of firewood. Pierrot had chased him, but this was the first time he had been near enough to the man-monster to see the red glow in his eyes. They were not like the eyes of the wonderful creature who had almost caught him in the web of her hair, and who had crawled after him under the rock. They were beast-eyes. They

"You Little Devil!"

made him shrink and try to draw his head back into the blanket as the stick was raised. At the same time he snarled. His white fangs gleamed in the firelight. His ears were flat. He wanted to sink his teeth in the throat, where he had already drawn blood.

The stick fell. It fell again, and when McTaggart was done Barée lay half-stunned, his eyes partly closed by the blows and his mouth bleeding.

"That's the way we take the devil out of a wild dog," snarled McTaggart. "I guess you won't try the biting game again, eh, youngster? A thousand devils—but you went almost to the bone of this hand!"

He began washing the wound again. Barée's teeth had sunk deep, and there was a troubled look in the Factor's face. It was July—a bad month for bites. From his kit he got a small flask of whisky and turned a bit of the raw liquor on the wound, cursing Barée as it burned into his flesh.

Barée's half-shut eyes were fixed on him steadily. He knew that at last he had met the deadliest of all his enemies. And yet he was not afraid. The club in Bush McTaggart's hand had not killed his spirit. It had killed his fear. It had roused in him a hatred such as he had never known—not even when he was fighting Oohooml-

sew, the outlaw owl. The vengeful animosity of the wolf was burning in him now, along with the savage courage of the dog.

Barée did not take his eyes from McTaggart as he smoked. He watched the man when the latter stretched himself out on the bare ground and went to sleep. He listened, still later, to the man-monster's heinous snoring. Again and again during the long night he struggled to free himself. He would never forget that night. It was terrible. In the thick, hot folds of the blanket his limbs and body were suffocated until the blood almost stood still in his veins. Yet he did not whine.

They began to journey before the sun was up, for if Barée's blood was almost dead within him, Bush McTaggart's was scorching his body with the heat of its anticipation. He made his last plans as he walked swiftly through the forest with Barée under his arm. He would send Pierrot at once for Father Grodin at his Mission seventy miles to the west. He would marry Nepeese—yes, marry her! That would tickle Pierrot. And he would be alone with Nepeese while Pierrot was gone for the missioner.

This thought flamed McTaggart's blood like strong whisky. There was no thought in his hot and unreasoning brain of what Nepeese might say—of what she might think. He was not after the soul of her. His hand clenched, and he laughed harshly as there flashed on him for an instant the thought that perhaps Pierrot would not want to give her up. Pierrot! Bah! It would not be the first time he had killed a man—or the second.

McTaggart laughed again, and he walked still faster. There was no chance of his losing—no chance for Nepeese to get away from him. He—Bush McTaggart—was lord of this wilderness, master of its people, arbiter of their destinies. He was power—and the law.

The sun was well up when Pierrot, standing in front of his cabin with Nepeese, pointed to a rise in the trail three or four hundred yards away, over which McTaggart had just appeared.

"He is coming."

With a gasp which had aged since last night he looked at Nepeese. Again he saw the dark glow in her eyes and the deepening red of her parted lips, and his heart was sick again with dread. Was it possible—

She turned on him, her eyes shining, her voice trembling.

"Remember, Nootawe—you must send him to me for his answer," she cried quickly, and she darted into the cabin. With a cold, gray face, Pierrot faced Bush McTaggart.

## Chapter VII

From the window, her face screened by the folds of the curtain which she had made for it, the Willow saw what happened outside. She was not smiling now. She was breathing quickly, and her body was tense. She heard McTaggart's coarse voice, his boisterous greeting, and then she saw him showing Pierrot what he carried under his arm. There came to her distinctly his explanation of how he had caught his captive in a rabbit-snare. He unwrapped the blanket. Nepeese gave a cry of amazement. In an instant she was out beside them. She did not look at McTaggart's red face, blazing in his joy and exultation.

"It is Barée!" she cried.

She took the bundle from McTaggart and turned to Pierrot.

"Tell him that Barée belongs to me," she said.

She hurried into the cabin. McTaggart looked after her, stunned and amazed. Then he looked at Pierrot. A man half blind could have seen that Pierrot was as amazed as he. Nepeese had not spoken to him—the Factor of Lac Bain! She had not looked at him! And she had taken the dog from him with as little concern as though he had been a wooden man. The red in his face deepened as he stared from Pierrot to the door through which she had gone, and which she had closed behind her.

(TO BE CONTINUED.)

## Great Voices Called Accidents of Nature

"Great voices are rare and undoubtedly owe their wonderful purity of tone to an accidental combination of those physical characteristics which lead to the production of song. The human musical instrument, though built of living tissues, resembles in structure the reed organ pipe fitted with a vox humana stop. In both cases the note depends on the vibrations of a column of air produced in the organ by a reed and in the voice by the vocal cords. The human air chamber corresponding to the organ pipe is composed of the larynx and the bronchial system beneath it.

The throat, mouth and nasal cavities form the resonators which, by alternation in shape and size, are able to pick out and emphasize certain component parts of the funda-

mental tones produced in the larynx. The lungs form the bellows which produce the upward blast of air, and upon their quality depends the loudness of the voice.—London Daily Mail

## Milk Products Old

Butter was known for at least 2,000 years before the Christian era. It was not used as food, however, but mostly as a medicine and ointment, and in some parts was employed as an illuminant for lamps. The butter was churned crudely in skin bags or pouches, and was a very inferior article. Cheese has been known since the earliest times, the oldest mention of it occurring in 1400 B. C. It was used as an article of food before the

## Lesson for August 22

### THE TEN COMMANDMENTS—DUTIES TO GOD

LESSON TEXT—Exodus 20:1-11. GOLDEN TEXT—Thou shalt love the Lord thy God with all thine heart, with all thy soul and with all thy strength.

PRIMARY TOPIC—The Commandments About God. JUNIOR TOPIC—How to Serve God. INTERMEDIATE AND SENIOR TOPIC—Loving and Honoring God. YOUNG PEOPLE AND ADULT TOPIC—God's Claims to Loving Service.

The Ten Commandments furnish us with the greatest moral code that the world has ever seen.

I. The Preface to the Decalogue (vv. 1, 2).

The Ten Commandments are based upon the truth set forth in the preface. Two great thoughts underlie this. What the Lord is and what He did. What He is is embodied in the name Jehovah-Elohim. The name Jehovah sets forth three great truths, viz.:

1. His all-sufficiency. All that He is and does centers in Himself.

2. His sovereignty. There is no being equal to Him, nor above Him. He is outside of and above every being in the universe. He is immanent and transcendent.

3. His unchangeableness. The "I am that I am" (Ex. 3:14) may be expanded into "I am what I was," "I will be what I am," "Jesus Christ is the same yesterday, today and forever" (Heb. 13:8). The name Elohim signifies the strong and mighty one. What He did is asserted to be their deliverance from Egyptian bondage.

II. The First Commandment (v. 3). "Thou shalt have no other gods before Me" means literally, "Thou shalt have no other gods before My face." This commandment requires single-hearted worship and service. Every man has his god. It is either the true God or a false god. Life itself with all its activity is worship. The center around which our activities revolve is our God. This commandment may be broken:

1. By living for one's self. If one's activities gather around himself he worships himself and is therefore an idolater.

2. By making pleasure the goal of our lives and spending our time and money for sensual enjoyment.

3. By being covetous (Col. 3:5). Every man who is greedy for gold breaks this commandment.

III. The Second Commandment (vv. 4-6).

The first commandment is directed against false gods. The second is directed against the worship of the true God with false forms. This commandment may be broken:

1. By resorting to the use of crosses and images in our worship.

2. By putting into the place of Christ the pope and following after priestcraft. It should be observed that this commandment is accompanied with a warning and a promise. The warning is that iniquity will be visited upon the children even to the third and fourth generation. The promise is that He will show mercy to thousands. This means that the workings of the same divine law will pass on God's mercy to thousands of generations.

IV. The Third Commandment (v. 7). The Hebrew word translated "vain" in this prohibition against taking the name of God in vain means lying, deceptive, untruthful. Therefore, to take the name of God in vain means to use it in a lying, deceptive and untrue way. The word "guiltless" is from a Hebrew word, the root-meaning of which is to be clean, to go unpunished. The meaning, therefore, is that God will not hold such a man to be clean and will not allow him to go unpunished who takes the divine name in a lying and hypocritical way.

The third commandment may be broken:

1. By profanity.

2. By perjury.

3. By levity and frivolity.

4. By hypocrisy, which is professing to live for God when living for self.

V. The Fourth Commandment (vv. 8-11).

The essential principle embodied in this commandment is work and rest. It enjoins work on six days and forbids work on the seventh. The command to work six days is just as binding as the rest on the seventh. Only those who have worked can really rest. This commandment may be broken:

1. By living in idleness.

2. By working on the day set apart for the worship of God.

3. By making it a day of feasting.

4. By devoting it to pleasure and games.

## Trusting in God

An individual heart, which worships God alone, and trusts Him as it should, is raised above all anxiety for earthly wants.—Gelkie.

## Every Sin a Mistake

Every sin is a mistake as well as a wrong; and the epitaph for a sinner is: "Thou Fool."—Maclaren.

## Men of Secret Prayer

The men whom God uses most are men of secret prayer.

## HOW TO KEEP WELL

DR. FREDERICK R. GREEN  
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

## GOITER IN SCHOOL CHILDREN

SO MUCH has been said and written about goiter that almost every school child now knows that goiter is an enlargement of the thyroid gland in the neck; that, while there are many kinds of goiter, simple goiter is an enlargement of the thyroid without any other marked constitutional symptom; that this form of goiter is especially common in some parts of the country, the so-called goiter belt or goiter zones, and that it is probably due to lack of iodine and is consequently most common in those parts of the country far from the sea. Some very interesting theories have been suggested such as that, on account of all the higher animals having developed from fishes, this need of iodine is due to a demand of the human body for sea foods and sea products. However that may be, it has been abundantly proven that simple goiter can be prevented by small doses of iodine in salt or in drinking water and that simple goiter can be largely cured by small doses of iodine.

The question of the prevention and cure of goiter having been largely solved, the question now interesting investigators in this field is, what effect does goiter have on the physical and mental condition of the child? Does the child with goiter have less mental ability than the normal child?

In an effort to secure some information on this point, Dr. Robert Olsen of the United States public health service and Dr. Mabel R. Fernald, director of the psychological laboratory of the Cincinnati public schools, have just completed a study of nearly four thousand public school children in that city. The result is published in the Public Health Reports for May 21, 1926.

The complete report covers many pages. Only the summary can be given here. Out of 3,796 children, some degree of goiter was found in 25.2 per cent of the boys and 39.6 per cent of the girls. Comparing the school record of the children with goiter with the school record of normal children failed to show sufficient marked difference to justify the conclusion that the child with a normal thyroid was any brighter than the child with an enlarged thyroid or, to put it the other way round, that the child with an enlarged thyroid was any different mentally than a normal child. Marked enlargement apparently reduces the child's mental ability, but the number of such children was too small to warrant any general conclusion on this point.

## FORECASTING DISEASE

ONE hundred years ago the idea of predicting the weather would have been regarded as not only impossible but also as absurd. Five hundred years ago it would have been considered blasphemous. God sent rain upon the just and the unjust. Hall storms and tornadoes were sent by malicious demons. How could their whims be forecast?

Yet today the weather forecast is probably the first thing in the paper the average person reads. What kind of weather are we going to have today? Let's read what the weather bureau says.

Until recently the idea of forecasting disease also appeared ridiculous. Sickness, pestilence and epidemics were certainly things that were regulated by super-human minds. How could such things be predicted? Yet when the League of Nations first met Dr. Richard M. Strong, an American public health authority, proposed, as one of the principal activities of the league, a series of health observation stations all over the world to report daily to a central station at Geneva, just as the various weather observation stations report to a central station, so that advance warning of coming epidemics could be sent out all over the world.

This plan wasn't adopted, more's the pity, but it will be some day. Meanwhile, in a recent issue of the Scientific Monthly appears an article by Dr. Victor C. Vaughan, formerly dean of the University of Michigan medical school and a member of the National Research Council. Doctor Vaughan's article on the "Present Prevalence of Contagious Diseases" is just the same as a weather bureau report, only it deals with disease instead of weather.

Measles, says Doctor Vaughan, is now unusually prevalent all over the world. This disease itself is seldom fatal, but it is followed, in many cases, by pneumonia, which is highly fatal. Influenza is increasing, both in frequency and virulence, all over the world. Another epidemic of the disease such as we had in 1917-18 will come sooner or later. Scarlet fever, while common, is mild. Smallpox, both the mild and severe form, is common wherever vaccination is neglected. In 1925 there were ten times as many cases in this country as there were in Russia. Cholera was common in China, Japan, Siam and the Philippines, but did not appear in America. There has been no yellow fever in the western hemisphere since 1923. Plague has also about disappeared on this side of the Atlantic.

# ATWATER KENT IGNITION for Fords

Get rid of trouble

—with an Atwater Kent Type LA Ignition System for Fords. Its mechanism is protected from dirt and oil. The contactless distributor eliminates wear. It means a smoother running motor, easier starting, quicker pick-up, with more power on the hills.

A complete scientific ignition system of the same general design as the Atwater Kent Ignition Systems used as standard equipment on many of America's foremost cars. Twenty-six years in making scientific ignition systems back of it. Installed in less than an hour. Everlastingly dependable.

Type LA  
Price

## Progress Comes Even to Bermuda

The Bermudas, isles of onions, Easter lilies, lyric grooves and healing sunshine, have never heard the honking rattle of an automobile or the clank of a chugging train. But Great Bermuda, the largest of the islands, is 14 miles long, 1 mile wide. Hack horses and bicycles simply cannot keep up the pace, either of today's onion industry or modern fashions in holiday making, so after a 50-year struggle with transportation, the islanders announced they would have, not automobiles to bury the scenery in pulverized coral from the roads, but a discreet little third-rail electric railroad, linking St. George, Hamilton and Somerset ferry. The Bermuda Railway company was careful to add that its trains would have trailers for baggage and bicycles. Die-hard Bermudians nevertheless shook their heads. "Alas," said they, "and then it will be freight cars, milk trains, grade crossings, progress."—Time.

## Guard Banks' Money

The majority of the New York banks use armored cars in transporting their money and other valuables around the city. Several companies operate these cars, the guard and drivers of which are carefully selected men. One company hires only American citizens who have unblemished records, who have passed rigid intelligence and physical examinations and who are expert marksmen.

## Sure Relief

BELL-ANS FOR INDIGESTION  
25¢ and 75¢ Pkgs. Sold Everywhere

Keep Stomach and Bowels Right  
By giving baby the harmless, purely vegetable, infants' and children's regulator.  
**MRS. SINGLOW'S SYRUP**  
brings astonishing, gratifying results in making baby's stomach digest food and bowels move as they should at teething time. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Safe and satisfactory.  
At All Druggists

After A Bath With  
**Cuticura Soap**  
Dust With  
**Cuticura Talcum**  
Delicately Medicated Of Ploasing Fragrance

## ALLEN'S FOOT-EASE

For Tired Feet It Can't Be Beat  
At night when your feet are tired, sore and swollen from much walking or dancing, sprinkle two ALLEN'S FOOT-EASE powders in the foot-bath, gently rub the sore and inflamed parts and relief is like magic. Shake Allen's Foot-Ease into your shoes in the morning and walk in comfort. It takes the friction from the shoe. Sold every where. For FREE Sample and a Foot-Ease Walking Doll, address, ALLEN'S FOOT-EASE, Le Roy, N. Y.

## “BY THEIR SCHOOLS YE SHALL KNOW THEM”

(continued from front page)  
Pretty good for an average boy! If one of our Palos boys succeeds as well as Robert Lincoln has done we shall be proud of him! Abraham Lincoln was a sensible man and he sent his son to the “best schools.”

All of the parents who have the welfare of their children at heart, and where is there a parent who hasn't, want their children prepared for life. And the grade school is the foundation of all later education and training.

(continued next week)

## MOKENA

MOKENA M. E. CHURCH NOTES  
Glen T. Beaty, Pastor.

Sunday school 10:30 A.M. Mrs. Wm. Lathrop acting Superintendent. We are using our summer sessions in a profitable way and having fine times. All are invited to help us and themselves.

The Sunday school picnic is held this Friday afternoon in the village park. Rev. Beaty will have charge of the games and promises a good time. The Ladies Aid is talking nothing but “eats” so we are sure of a great supper.

Rev. Beaty has spent the week in Mokena. He has been planning for the picnic, helping to draw the Conference Year to a good close, and using some of our boys in cutting weeds and cleaning the church.

The sermon Sunday night will be “The Glory of the Greatest Victory,” a sermon of interest to children young people and adults of all creeds.

ST. JOHN'S ANGEL CHURCH  
W.J. Cramer, Minister.

Sunday school at 9:30 A.M.  
English Service at 10:30 A.M.  
Orchestra rehearsal Monday evening at 7:30.

Born a son to Mr. and Mrs. Fred Brown of Lockport. Mrs. Brown was formerly Miss Alma Schiek.

Clifford Knudson and Leon Tonn leave on a weeks vacation to the Dells, Wis., Sunday morning. They will make the trip by motor.

Mr. and Mrs. John Mattes leave next week for a vacation trip to Wisconsin.

Clifford Mahoney is spending his vacation on the Henry Minger farm at Manhattan. He is having the time of his life.

Born to Mr. and Mrs. Ben Young Thursday, a daughter.

John Lange and family who were called here by the illness and death of the former's mother, Mrs. Albert Hodell have returned to Grand Island, Neb.

Wm. Abbe is visiting at Ida Grove, Iowa.

Mr. and Mrs. Wm. Semmler and daughters and Mr. and Mrs. Hugh D'admore visited Sunday in Ritchie at the home of Mr. and Mrs. L. Graybeal.

The Bowman Dairy Co. have been removing machinery from their local plant the past few weeks. It is understood the dairy will be used as a cooling plant but not as a bottling one.

The A.E. Wachter family returned from a vacation trip to Grand Rapids, Mich.

The condition of Mrs. Lizzie Moriarty is such that she will be able to soon be brought to the home of Mrs. Rose Moriarty.

Wm. Neithammer and daughter Ruth returned Saturday from a trip to St. Louis.

Mr. and Mrs. Wm. Lynk and daughter Elizabeth and Mr. and Mrs. Oscar Klose leave Saturday for a vacation in Wisconsin.

The infant son of Mr. and Mrs. Harold Spiess was christened Sunday.

Mrs. Conrad Bettenhausen is very ill at her home, suffering from hemorrhages of the stomach.

Mr. and Mrs. Geo. Koeller and family have gone on a vacation trip.

## CARD OF THANKS

We desire to thank all our relatives and friends and neighbors for the kindness and sympathy shown us during the recent illness and death of our beloved mother, Mrs. Albert Hodell. Also for the beautiful floral offerings.

The Children.

## TINLEY PARK

Mr. and Mrs. H. Glogwartz are the proud grandparents of a baby boy born to their daughter, Mrs. D.E. Lutz of Quincy, Ill.  
Mrs. Glogwartz and daughter Adeline are preparing to leave for Quincy to see the big boy. Don't suppose their is a tape line large enough to go around Henry's chest.

TINLEY PARK M.E. CHURCH  
Glen T. Beaty, Acting Pastor  
Our Sunday school is back from its vacation and doing fine. We invite all to attend. Mrs. H.W. Wyman is the superintendent.

Sunday at 11 A.M. Rev. Beaty will preach one of his sermons on great literature. The subject is “The Great Stone Face” and the message of “Esther” or “The Call of the Master.” Children, young people and adults of all creeds will be interested in the interpretation of these two stories from great literature.

While playing in the street with a hoop, a small boy off the Mullen family ran in front of a car driven by Ernest Rice local mail carrier and was knocked into the Mr. Rice did his best to avoid hitting the child was laid up for a few days.

The son of Mr. and Mrs. Fred Hopman ran in front of the truck of G. Dini and was struck but not injured.

Mr. and Mrs. H. C. Vogt and children returned Wednesday from their vacation spent in Wis.

Mr. and Mrs. Dick Bruening, Miss Mennie Mager and Wm. Rick have motored to Wisconsin where they will spend their vacation.

Miss Alma Lehnert who is employed by the Dick Bruening is spending her vacation at her home in Mokena.

All village water users in Tinley must install water meters by Jan. 1st. The village has contracted for 200 Badger water meters which will be sold to water users for \$10 piece.

Threshing is well under way at this time. Oats run from 40 to 55 bushels per acre.

## FRANKFORT

### CARD OF THANKS

We wish to thank the Frankfort Telephone operators and Fire Department for their efficient service and all others for their kind help in fighting the recent fire on our farm. Fred Hinspeter and family.

Mr. and Mrs. F. J. Kohlhaugen and daughter left Monday on a motor trip to Iowa City, Iowa to visit with their daughter and husband, Dr. and Mrs. Waggoner. This is Mr. Kohlhaugen's first vacation in 30 years. Here's hoping he is enjoying it.

## OAK LAWN

Mr. and Mrs. T.V. Wall have returned to their home after spending the week end visiting relatives in Decatur.

## PALOS PARK

Misses June and Amber Rose O'Connor celebrated their birthdays Monday with a party to twelve little girls. June is eleven years of age and Amber Rose, seven. The guests were LaVerne and Frances Wahn, Emily and Elsie Martin, Dorothy and Helen Boone, Bess Butler, Audrey Jungren, Cora Beth and Jean Wells.

The Palos Woman's Club is to have its regular meeting at the home of Mrs. Paul Cornell, Thursday August 19th. The will be “Peer Gynt”, presented by Mrs. Patterson and Mrs. Quick.

Miss Jessie Bartlett has been ill in Chicago, but has recovered sufficiently so that she is now setting up.

The rains of the present season have produced gorgeous flower gardens and orchards whose trees are bending and breaking under their loads of fruit. Never have we seen the country in August so luxuriantly green, and the gardens so beautiful. Our Flower Show at the Club House in September should surpass any we have so far held.

Now that the automobile traffic thru Palos Park is both so profuse and rapid, the need for danger signals at the intersections of roads with 123rd St., has become keen, and this matter was taken up at the last meeting of the Palos Improvement Club. The junction at the south end of 93rd Ave., or “Precipice Road” as it used to be called, is especially hazardous. Motorists unacquainted with the town, and speeding along the cement road cannot see the road until they are well across it. There should be danger signals, some feet both to the east and west of the junction.

## PROFESSIONAL CARDS

Sixteen ounces of gold are sufficient to gild a wire that would encircle the earth.

## WAREHOUSE GIVES PLAN TO PROTECT PEOPLE FROM WILD-CAT PROMOTERS

American Bankers Association Official Who Has Exposed Fraudulent Schemes for Robbing Savers Draws Up Set of Rules to Foil Crooks.

By W. R. MOREHOUSE,

Public Relations Commission, American Bankers Association.

## ARTICLE NO. IV

THE solution to the great problem of protecting savings depositors from losing their money in fraudulent schemes is largely in the hands of our bankers. If they will co-operate with those who save they can make it hard for these plunderers to continue business. Hasten the day when our bankers without exception will gladly welcome interviews with depositors who contemplate making investments, will urge an investigation or recommend in the stead of little-known securities investments of unquestioned responsibility. In every case where customers call at the bank excited and nervous over some scheme where by investing a few hundred dollars they expect to make thousands any banker will at once sense the situation.

W. R. Morehouse

The banker knows that the depositor is being rushed off his feet, with “Hurry, hurry and get in on the big clean-up!” and it remains for the banker to caution the depositor against such tactics. In order to prevent this all that our bankers have to do is to suggest that their customers make it a rule always to bring high-pressure salesmen to the bank to be interrogated regarding their promotions. This will break up sales nine times out of ten, for high-pressure salesmen invariably avoid being questioned too closely by bankers who know investments.

## Rules to Follow

Our bankers should urge this investment slogan: “Investigate before you invest. Consult your banker first,” and so indelibly impress it on the minds of their depositors that they will always be guided by their banker's advice in making investments. Salient points which should be kept before the investing depositor are:

- (1) There are three cardinal points to all good investments, namely safety of principal, certainty of income and salability.
- (2) Safety of principal is more important than a high yield; the promise of big returns is usually a sign of a risky speculation.
- (3) It is like taking a leap in the dark to invest in promotions which are an unknown quantity and for this reason a thorough investigation should always be made.
- (4) It is morally wrong, if not criminally so, for any person to invest in any proposition he feels is a skin game, or which is tainted by trickery or fraud or opens the way for a favored few to “get in on the ground floor,” clean up and get out from under before the scheme collapses. Usually the depositor finds he is not in on the ground floor, there is no chance for him to clean up before the scheme collapses and so he loses all that he has invested.
- (5) If a promotion is as good as claimed, it would not be necessary for high-pressure salesmen to resort to all sorts of questionable methods, it would not be necessary to rush a victim off his feet and sign him up before he could interview his banker, but he could be given time to consult others before investing.
- (6) The only reason high-pressure

pirates go to those who are inexperienced in finance for funds is because they can palm off on them so-called investments which in the eyes of men of experience are valueless.

(7) The glib-talking promoter is not a true friend of the savings depositor but is a wolf in sheep's clothing, he will resort to any kind of trickery to exchange a certificate of stock for the depositor's cash, his glittering promises are fictitious and he is planning how he can entrap his victims and relieve them of their savings and not how he can make good dividends for them.

(8) For every oil well that pays dividends there are many dry holes and abandoned drilling rigs, and for every profitable mine there are many abandoned shafts, and for every successful promotion there are a thousand failures, and because of these facts the savings depositor's chance of winning is too small to justify the great risk involved.

(9) Savers should steer clear of stock, shares or units in world-revolutionizing inventions which are peddled in front of empty stores or sold from house to house or through the mails.

(10) Every novice investor should remember that, as in all lines of business, black sheep have invaded the investment field. They must be shunned, while investment firms and salesmen of responsibility and integrity should be supported.

Let our banks unite in a movement designed to protect the depositor against the schemes of the wild-cat promoter—in a movement that will save our savings depositors from despair and from poverty as a result of having lost all—in a movement that will turn into legitimate investment channels the millions of dollars which are now wasted on fraudulent schemes of one kind or another. The best service a bank can render a novice investor is to keep him from making poor investments by helping him to make good ones.

## A DECALOGUE FOR MOTORISTS

By LOUIS L. EMMERSON, Secretary of State.

1. Read and obey traffic signs.
2. Observe the right-of-way and keep on the right side of the road.
3. Signal before turning or stopping and sound horn before passing a car going in the same direction.
4. Use your headlights after dark and dim them when approaching another car.
5. Secure your license promptly and keep the plates clean.
6. Exercise the greatest care in crossing railroads.
7. Be as courteous to others as you expect them to be to you.
8. Go slow in passing children on the side of the road.
9. Look behind before pulling out or backing out from the curb.
10. Obey all motor vehicle laws.

## By Taking Advantage of OUR SPECIALS
